Structural Features:

- Modular drawer design provides numerous drawer options to meet your individual needs.
- Industrial-grade design and superior technology insures every cabinet stands up to only the highest industry quality standards.
- Drawer weight capacity, steel construction and thick, hard-wearing powder coating guarantees cabinets are durable and long-lasting.

Optional thick-wall ABS modular compartment bins available

Every drawer includes a safety latch to prevent accidental opening

Master cabinet key locks come standard on every cabinet

Drawer heights above 4" include double-rail design providing 100% opening access and 300 lbs. capacity

6"	(150mm)
8"	(200mm)
10"	(250mm)
12"	(300mm)
16"	(400mm)

Tough, Flexible and Smooth

The guts of the ShopFlow cabinet is, of course, the heavy-duty drawer. ShopFlow cabinet drawers are built to offer maximum design flexibility and carry a huge payload.

Drawers are available in nine standard heights featuring a double-track rail system that allows 100% opening access to contents and carries tremendous weight capacity. Plus, the special "glide-eze" rail design uses bearings to insure smooth action opening and closing even under heavy weight applications.

Steel drawer dividers come standard in every cabinet
